

Table S2. Pairwise contrasts between each (mis)alignment levels at the plot scale in natural conditions (i.e. with neighbors). Contrasts are outputs from WALD tests on the multinomial model.

Pairwise comparison	z-score	P-value
aligned absent / dispersal limitation	3.9836	0.000
aligned present / dispersal limitation	1.1953	0.232
sink / dispersal limitation	3.8752	0.000
aligned absent / aligned present	4.0346	0.000
sink / aligned absent	-0.5145	0.303
sink / aligned present	-4.7250	0.000
